Subject: **Request for Expressions of Interest for External Expertise of GOAL nZEBs project.**

**INTERREG IPA II CROSS-BORDER COOPERATION PROGRAMME GREECE -
ALBANIA 2014-2020**

Project: Greece cOllaborates with ALbania for nZEBs “GOAL nZEBs”

In framework of the INTERREG IPA II Cross-Border Cooperation Programme Greece -Albania 2014-2020 with reference number “A4-1.3-8” will develop the project: **Greece cOllaborates with ALbania for nZEBs “GOAL nZEBs”** focus on the promotion of the safe, environmentally responsible and efficient supply and use of energy in all its forms and applications, for the best benefit of the Albanian society as a whole and the implementation of mature demonstrative small-scale investments at public facilities.

The GOAL nZEBs project has a separate WP for the dissemination, capitalization and maximization of the results that will generate follow-up activities, ensuring the applicability and replicability of project outputs. Specifically, the results will be transferred to target groups through the developed web site and on-line platform. These tools will be in operation at least until 2024 ensuring the sustainability and long-term impact of the project. Furthermore, the presence of two national bodies (CRES, AEE) at the consortium responsible for energy policies and strategies can further ensure the appropriate diffusion of the outputs outside the current partnership. The main outputs of the project are expected to be used as follows:

- The results from the small-scale investments can be utilized by regions and municipalities of the area for supporting associated plans (e.g. Sustainable Energy and Climate Action Plans).
- The demonstration of effective technological solutions for EE at public buildings will contribute to the future design of targeted mature projects and investments in the framework of INTERREG Programmes, National Operational Programmes, and United Nations funding Programmes etc.
- The implementation of the proposed solutions is in line with specialized national and regional policies (e.g. Research and Innovation Strategies for Smart Specialization-RIS3, Integrated

Territorial Investments-ITI etc.). This can contribute to the replicability of the outputs prior to future large-scale implementation.

Specific targets of external expertise for the preparation of “Project Management & Coordination” (WP1), “Communication & Dissemination” (WP2), GOAL - Small-scale Investments towards Public nZEBs (WP3 and GOAL - Joint Approach towards Public nZEBs (Smart Initiatives & Energy Communities) (WP4) of the GOAL nZEBs project are as follows:

WP 1	Project Management & Coordination
Del. 1.4.2	AEE Contribution to Project Reports
Del. 1.4.3	Organization & Participation in Meetings/Events by AEE
WP 2	Communication & Dissemination
Del. 2.4.1	Communication and Dissemination Actions by AEE
WP 3	GOAL - Small-scale Investments towards Public nZEBs
Del. 3.4.1	Technical Support of the GOAL Small-scale Investment in Albania
Del. 3.4.2	GOAL Small-scale Investment in Culture Building of Gjirokastra
Del. 3.4.3	Smart Monitoring of the GOAL Small-scale Investment in Gjirokastra
WP 4	GOAL - Joint Approach towards Public nZEBs (Smart Initiatives & Energy Communities)
Del.4.4.2	Pilot Operation of an Energy Community towards public nZEBs' Development in Gjirokastra

The interested experts/or consulting firms are invited to present in support of the implementation:

- i) A request for expressions of interest;
- ii) CVs; and
- iii) Reference of working experience in similar assignments.

To the Agency of Energy Efficiency, **within June 15th, 2020** at the address: *Evis Berberi Director of Agency of Energy Efficiency Address: Bulevardi "Bajram Curri" Rr. Viktor Eftimiu, Ish Godina e KESH, Tiranë, E-mail: <evis.berberi@eficenca.gov.al>, tel:00 355 692059444.*
